

DAS 3000-1

The easiest setup with the most precise calibration

Precision measurement and recalibration solution for ADAS-equipped vehicles of today and the future.

Works with Bosch
ADS 625

BOSCH
Invented for life

Calibrate faster. Generate more revenue. Grow your business. Repeat.

The complete solution that enables shops to recalibrate vehicle camera and radar systems with **confidence, speed, efficiency, precision** and a **vision for the future**

Tech support included FREE for the first year

The DAS 3000 utilizes the ADAS workflow process on the ADS 625 to walk you through the calibration, step-by-step, for every vehicle.

The leading Tier 1 ADAS sensor supplier and partner to the OEMs with extensive and continuously expanding vehicle coverage.

Precision and Confidence

Guided Interactive Calibration

The superior ADAS workflow can guide you from setup through calibration in half the time.

Bosch ADAS Positioning (BAP) Software

No tape measures. No plumb bobs. No mirrors. DAS 3000 goes the distance and measures, too – utilizing digital camera recognition innovations for distance measurement and setup.

Speed and Efficiency

Optimized target configurations

Optimized target configurations means less time fumbling through the setup – and less time means more money in your pocket.

Storage case fits inside the ADAS frame

Integrated storage

Convenient storage keeps your equipment contained for immediate access during your first calibration and for all the ones that follow.

Expert Development and Next Generation Design

Precise Recalibration is Critical

Through our engineering expertise and extensive testing, gain confidence in precise measurements and trust that your customers' vehicles are recalibrated within the tightest tolerances to the strictest standards, correctly the first time.

OE Sensor Development

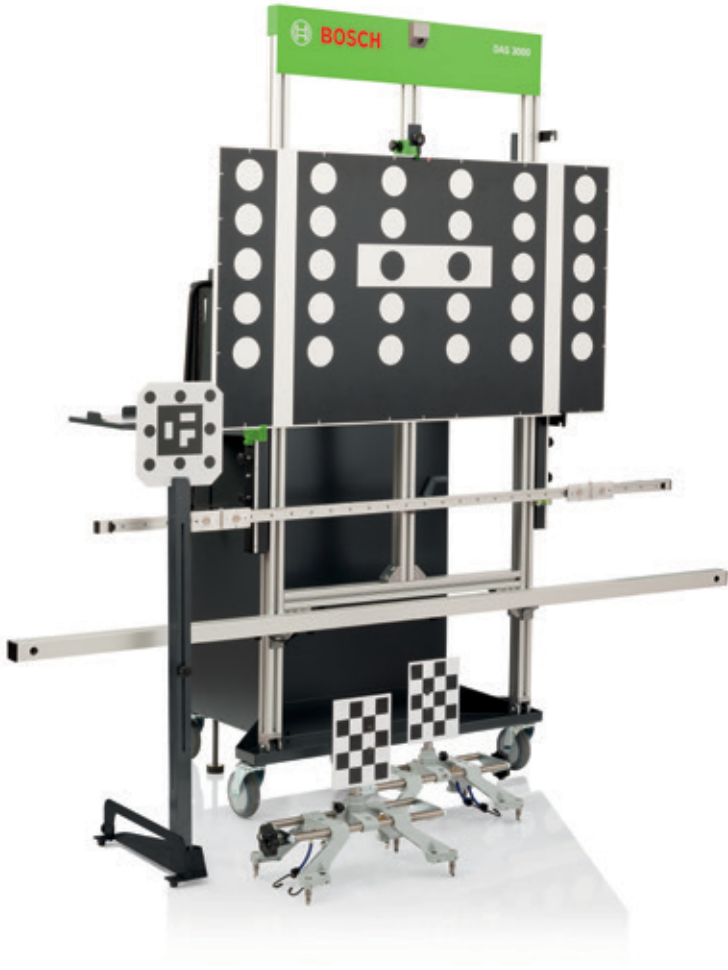

Co-developing the next generation of vehicle sensors with major OEMs means your equipment is ready for the vehicles of today and of the future.

Bosch Family of Diagnostics

You can count on Bosch, the global leader in diagnostics, to deliver a full range of solutions that work together to make your service process a breeze.

DAS 3000-1 Includes

Target Boards

VW/Audi Combo Camera/Radar Target Board	
Subaru 2.1 & 3.1 Target Board	
Universal XL Target Board	
Honda #1 Target (set of 2)	
Toyota #1 Target	
Daimler/Infiniti #2 Target	
Mazda #1 Target	
Honda #3 Target	
Toyota/Lexus #3 Target	
Hyundai/Kia #3 Target	
Nissan #2 Target (set of 2)	
Universal/Infiniti #1 Target (set of 2)	
Mitsubishi #1 (set of 2)	

Primary Components

Fixture	
Wheel Clamp Targets	
SCT 815 Prismatic Radar Reflector	
Distance Target	
ADS 625 Scan Tool with Guided Tour Platform and Bosch ADAS Positioning (BAP) Software	

Floor Mats

GM	
Ford	
Honda	
Mitsubishi	
Nissan	

Integrated Target Storage

Stow your camera targets in a clean and serviceable way, allowing immediate access for the fastest calibration setup.
