

MOTOR calls it
“The Best of the Best.”
We agree.

The Bosch Mastertech VCI combines award-winning Vetronix software with a wireless PC-to-vehicle connection so your technicians can interface with more than one vehicle at a time. This innovation increases diagnostic efficiency and productivity to give you higher vehicle turnover without having to outsource repairs. So let your technicians access OE-level scan data, service information, shop management, parts and Internet-based knowledge databases all in one portable package with the Mastertech VCI. For more information on what *MOTOR* says is “The Best of the Best,” call 800.321.4889 or visit www.vetronix.com/aftermarket.
