RE: Correction to CDR Product Help File for Version 3.2

Dear CDR Users,

The Crash Data Retrieval (CDR) Product Team would like to inform you of a vehicle system that was mistakenly excluded from the Help File for CDR Version 3.2.

CDR Version 3.2 software application includes support for the retrieval of EDR crash data from Powertrain Control Modules (PCM) on 2008 - 2009 Ford Edge and Lincoln MKX vehicles. However, the CDR Help File shows support for only Airbag Control Module (ACM) coverage for these vehicles (see figure 1).

Make	Model	Module	Adapter/Cable	Module Location
		PCM	<a href="#">F-00K-108-221</a> & <a href="#">F-00K-108-222</a>	Driver Shock Tower
Ford	Edge (note 4)	ACM	<a href="#">F-00K-108-387</a> & <a href="#">F-00K-108-382</a>	Center Tunnel
Ford	Focus	ACM	<a href="#">F-00K-108-387</a> & <a href="#">F-00K-108-382</a>	Center Tunnel
Lincoln	MKX (note 4)	ACM	<a href="#">F-00K-108-387</a> & <a href="#">F-00K-108-382</a>	Center Tunnel
Lincoln	Town Car (note 4)	ACM	<a href="#">F-00K-108-387</a> & <a href="#">F-00K-108-382</a>	Center Tunnel

Figure 1: Help File shows only ACM support for 2008 & 2009 Edge/MKX

The system coverage for these vehicles is incomplete as it leaves out the PCM coverage. Please refer to the table below for the additional information for these vehicles which should have been included in the CDR Help File.

2008 – 2009

Make	Model	Module	Adapter/Cable	Module Location
Ford	Edge (note 4)	PCM	F00K108221 & F00K108223	Pass over engine
Lincoln	MKX (note 4)	PCM	F00K108221 & F00K108223	Pass over engine

We apologize for this oversight and plan to make the Help File corrections in the next version of the CDR software.

Yours sincerely,

Bosch Diagnostics, CDR Product Team
