New CDR Kits for CDR Version 10.2

The following kits are now available for CDR version 10.2.

- ▶ **CDR DLC Kit - P/N: F00K108943**
 - Kit includes basic cables and hardware needed to retrieve crash data from most vehicles through the DLC connector.
- ▶ **US Accessory Kit - P/N: F00K108944**
 - Kit contains additional adapters needed to retrieve data from certain US Fiat, Ford and GM vehicles when imaging through the vehicle's DLC. Users located in North America should purchase this kit along with the CDR DLC Kit.
- ▶ **D2M Kit 10-28 - P/N: F00K108948**
 - Includes cables which were released in CDR software versions 1.0 through 2.8
- ▶ **D2M Kit 30-31 - P/N: F00K108949**
 - Includes adapters and cables which were released in CDR software versions 3.0 through 3.1.
- ▶ **D2M Kit 33-40 - P/N: F00K108950**
 - Includes cables which were released in CDR software versions 3.3 through 4.0.
- ▶ **D2M Kit 50-100 - P/N: F00K108951**
 - Includes cables and adapters which were released in CDR software versions 5.0 through 10.0.

Minimum PC Hardware Requirements

To install and run the CDR software, your PC must meet the minimum hardware requirements listed below:

- Processor Speed: 1GHZ or faster
- RAM: 256MB or more
- Disk Space: 100MB or more
- Video Resolution: 1028 x 768 or higher
- 1 open USB port

Supported Operating Systems

This version of CDR software is currently supported on the following US Windows® operating systems:

- Windows XP® (Home and Pro for PCs, 32 & 64 bit)
- Windows Vista® (32 & 64 bit)
- Windows 7® (32 & 64 bit)
- Windows 8® (32 & 64 bit)

Software Compatibility with the CDR Interface Module

This software version is compatible only with the blue and green metal CDR interface module marked with a CAN plus logo on its label. Other versions of the CDR module (black plastic or blue units without the CAN plus logo) are not supported and can cause the software not to function as intended. To purchase a current CDR Interface Module (P/N: F00K108954), please contact your local CDR Sales Representative.

Is Your CDR System Hardware Up to Date?

To take full advantage of this new software version, you need to obtain the new CDR Cables released for CDR version 10.0. You also need to make sure your CDR hardware is up to date. If your CDR Tool has not been updated recently, refer to the *Checklist for v10.0* which can be found on the Bosch Diagnostics CDR website located at <http://www.boschdiagnostics.com/testequipment/CDR/Pages/CDRHome.aspx>. Contact Bosch Sales and Support if you have any questions about the CDR products or you need to order new hardware or a software subscription.
