 - 2019 SL-Class
 - 2019 SLC-Class
 - 2019 Sprinter including Freightliner Sprinter (requires CDR Cable with ID 832)

New Hardware for 17.8

- ▶ CDR 900 (US/Canada markets)

The CDR 900 is a new vehicle communications interface device designed to meet performance and functional demands for upcoming vehicle networks. The new CDR 900 is essential for support of new vehicle model years and EDR systems coming this year. Contact your CDR tool distributor for more information on how to obtain the new CDR device. For additional information on the new CDR 900 you can visit the following link: https://www.boschdiagnostics.com/cdr/sites/cdr/files/cdr_900_flyer_en.pdf.

Important: The CDR 900 is available only in the US and Canada markets. Availability in other markets is to be announced.

Minimum PC Hardware Requirements

To install and run the CDR software, your PC must meet the minimum hardware requirements listed below:

- Processor Speed: 1GHZ or faster
- RAM: 256MB or more
- Disk Space: 100MB or more
- Video Resolution: 1028 x 768 or higher
- 2 open USB ports (one for CDR interface and the other for CDR500, both drives must be enabled to read USB mass storage devices)

Supported Operating Systems

This version of CDR software is currently supported on Windows® 7/8/8.1/10 (32 & 64 bit) operating systems with the minimum versioning requirements:

- Windows® - 10 Win 10 build 1507 or later
- Windows® 8.1 - Update 2919355
- Windows® 7 - at least SP1

Software Compatibility with the CANplus Interface

This software version is compatible only with the blue and green metal CDR interface modules marked with a CAN plus logo on its label. Other versions of the CDR module (black plastic or blue units without the CAN plus logo) are not supported and can cause the software not to function as intended. To purchase a current CDR Interface Module (P/N: F00K108954), please contact your local CDR Sales Representative.

Is Your CDR System Hardware Up to Date?

To take full advantage of this new software version, you need to obtain the new CDR Cables released up through CDR version 17.8. You also need to make sure your CDR hardware is up to date. If your CDR Tool has not been updated recently, refer to the Checklist for v17.8 which can be found on the Bosch Diagnostics CDR website located at <http://www.boschdiagnostics.com/testequipment/CDR/Pages/CDRHome.aspx>. Contact your CDR tool distributor if you have any questions about the CDR products or you need to order new hardware or a software subscription.
