## Software Highlights:

### Improved 10x Plus User Experience

We have made several improvements to the software for the new 10x Plus Diagnostic tool. We appreciate all user feedback as we work to fix all bugs reported.

### Improvements Made for VCI Connectivity

We have made several improvements related to the performance of your tablet and VCI maintaining a WiFi connection. We have heard your complaints, and work to improve the quality of our product.

## Coverage Additions

No Coverage Additions or Modifications in this release
