

MASTERTECH II J2534 VCI

MTECH2

Designed and Assembled in the USA

THE MASTERTECH IS BACK! The Mastertech II is the latest reprogramming device from Bosch, the world's leading J2534 VCI manufacturer for over 30 years.

As a J2534-1 and J2534-2 compliant VCI for OEM reprogramming and diagnostic applications, the Mastertech II:

- ▶ Quick and easy to connect to a vehicle from your PC* – pre-configured WiFi, Ethernet and USB connections
- ▶ Fully validated to operate with the top 6 OEM reprogramming applications – GM, Ford, FCA, Nissan/Infinity, Honda/Acura, Toyota/Lexus
- ▶ Supports PDU API (required for GM Tech2win) and Right to Repair (R2R) initiatives
- ▶ Designed to be compatible with future OE communications requirements
- ▶ Ruggedly designed for the shop and IP54 environmentally sealed

*Requires PC compliant with OE specifications and software

BOSCH
Invented for life
